

CHAPTER - I

1.1.INTRODUCTION OF THE STUDY

In today's rapidly evolving corporate world, mental health has become a vital aspect of ensuring a productive, engaged, and resilient workforce. With growing awareness around emotional well-being and psychological support, organizations are shifting from traditional employee assistance programs to more holistic mental health strategies. Mental wellness is no longer treated as an individual concern but as an organizational priority that influences employee performance, job satisfaction, interpersonal relationships, and overall company culture.

Azure Info Technologies, located in Madurai, is an emerging player in the IT sector known for its commitment to innovation, client satisfaction, and employee development. Operating in a high-pressure industry where employees often face strict deadlines, multitasking, and long working hours, the company recognized the need to address the growing mental health challenges in the workplace. In response, Azure Info Technologies has introduced several initiatives aimed at fostering a healthy and supportive work environment.

These initiatives include stress management workshops, regular mental health check-ins, peer support programs, and emotional well-being seminars. The company's approach emphasizes preventive care and emotional resilience, not only to improve individual well-being but also to enhance overall team performance and organizational outcomes.

This study aims to explore the impact of mental health initiatives introduced by Azure Info Technologies in Madurai on two key areas: employee productivity and workplace culture. While productivity focuses on performance, output, and efficiency, workplace culture involves trust, communication, inclusiveness, and respect among colleagues. The two are deeply interrelated—enhanced well-being can lead to increased motivation and better job outcomes, while a positive work culture supports sustained performance and team morale.

The importance of mental health support has grown significantly after the COVID-19 pandemic, which exposed employees to new psychological stressors such as isolation, burnout, and difficulty balancing personal and professional responsibilities. Many companies, including Azure Info Technologies, have responded with flexible work policies, mental health awareness drives, and wellness programs to retain talent and ensure business continuity.

The central objective of this report is to assess how effectively these mental health programs have been implemented at Azure Info Technologies, Madurai, and how they have influenced employees' attitudes, behaviors, and performance. Using surveys, interviews, and feedback tools, the study gathers insights from various departments to evaluate how these initiatives have impacted teamwork, absenteeism, job satisfaction, and the broader organizational culture.

1.2.INDUSTRY PROFILE:

Azure Info Technologies, headquartered in Madurai, is an emerging IT services and solutions provider committed to delivering innovative, high-quality, and cost-effective technology services. Guided by the tagline “Beyond Your Expectations...”, the company emphasizes customer satisfaction, technical excellence, and reliable service delivery.

1.2.1.Azure Info Technologies specializes in providing end-to-end solutions across various domains:

Software Development

At Azure Info Technologies, software development is at the core of our service offerings. We specialize in creating customized, scalable, and robust software solutions tailored to client needs. Our team follows modern development practices, including agile methodology, to ensure timely and efficient delivery. We work across various platforms and technologies to build web, mobile, and enterprise applications. By focusing on innovation and quality, we help clients achieve digital excellence and business growth.

IT Consulting

Azure Info Technologies offers expert IT consulting services to help businesses align technology with their strategic goals. Our consultants provide guidance on IT infrastructure, software solutions, and digital transformation. We analyze client requirements and recommend cost-effective, future-ready solutions. With a focus on innovation and efficiency, we enable organizations to optimize their IT operations. Our goal is to deliver measurable value and long-term success through smart technology decisions.

Web and Mobile Application Development

At Azure Info Technologies, we specialize in developing high-performance web and mobile applications tailored to client needs. Our team creates user-friendly, responsive, and secure apps using the latest technologies. We ensure seamless functionality across Android, iOS, and all web platforms. From idea to deployment, we focus on quality, scalability, and user experience. Our solutions help businesses connect with customers and grow in the digital space.

Digital Transformation Solutions

Azure Info Technologies empowers businesses through comprehensive digital transformation solutions. We help organizations modernize their operations, adopt cloud technologies, and automate workflows. Our solutions are designed to improve efficiency, customer experience, and decision-making. By integrating advanced tools and data-driven strategies, we drive innovation and agility. Our goal is to support clients in staying competitive in the fast-evolving digital landscape.

Cloud-based Services

Azure Info Technologies provides reliable and scalable cloud-based services to support modern business needs. We offer cloud migration, storage, infrastructure, and application hosting solutions. Our team ensures secure, flexible, and cost-effective deployment on platforms like Azure, AWS, and Google Cloud. These services enable businesses to improve accessibility, collaboration, and performance. With expert support, we help clients leverage the full power of the cloud for growth and innovation. With a strong focus on building client-centric strategies, Azure leverages modern tools and agile methodologies to ensure that every solution is tailored to meet the evolving demands of clients in both local and global markets. Their passionate team of professionals works collaboratively to bring innovation, efficiency, and excellence to every project.

1.2.2.LEADERSHIP AND VISION

At Azure Info Technologies, strong leadership and a clear vision drive our success. Our leaders are committed to innovation, integrity, and delivering exceptional value to clients. We aim to be a trusted technology partner, empowering businesses through digital excellence. With a forward-thinking approach, we embrace emerging trends to stay ahead in the IT industry. Our vision is to shape a smarter future through technology-led solutions.

1.2.3.INNOVATION

At Azure Info Technologies, innovation is at the heart of everything we do. We constantly explore new technologies to develop smarter, faster, and more efficient solutions for our clients. Our team encourages creative thinking and out-of-the-box ideas to solve real-world challenges. By investing in research and continuous improvement, we stay ahead in a competitive market. Our innovative approach helps businesses achieve long-term success and digital transformation.

1.2.4. INTERNSHIP

At Azure Info Technologies, our internship program offers hands-on experience in real-time IT projects. Interns are mentored by industry experts and exposed to cutting-edge technologies. The program helps students and fresh graduates develop technical skills, teamwork, and problem-solving abilities. We provide a professional learning environment that bridges the gap between academics and industry. Our goal is to nurture future IT professionals and inspire innovation from the start.

1.3.THEORETICAL BACKGROUND FOR STUDY

The relationship between employee engagement and customer satisfaction at Azure Info Technologies, Madurai, can be better understood through several key organizational and psychological theories. These theories help explain how employee attitudes and behavior impact customer experiences and business outcomes, especially in the IT sector.

1.3.1. Social Exchange Theory (SET)

At Azure Info Technologies, the Social Exchange Theory suggests that when employees feel supported, respected, and valued by the organization, they are more likely to show commitment and perform better. This positive exchange builds trust and loyalty, which is reflected in the way employees serve clients, thereby increasing customer satisfaction.

1.3.2. Service-Profit Chain Model

This model directly links employee engagement to customer satisfaction and profitability. At Azure, when employees are well-trained, motivated, and satisfied, they deliver superior IT and digital solutions to clients. This enhances the overall customer experience and leads to higher client retention and referrals.

1.3.3. Maslow's Hierarchy of Needs

In the fast-paced IT environment of Azure Info Technologies, addressing employees' needs—from basic (salary, job security) to advanced (recognition, personal growth)—helps them stay motivated and focused. Fulfilled employees are more engaged and show greater dedication to customer service excellence.

1.3.4. Herzberg's Two-Factor Theory

This theory explains that both hygiene factors (like work conditions and pay) and motivators (like achievement and recognition) play a role in engagement. Azure's efforts in providing a supportive work environment and career development opportunities help boost motivation, which translates to better service delivery and customer satisfaction.

1.4 STATEMENT OF THE PROBLEM

Organizations today face increasing challenges in retaining talent, maintaining employee satisfaction, and ensuring sustainable productivity in a competitive IT sector. Azure Info Technologies in Madurai, as an emerging technology firm, is no exception. With rapid technological advancements, diverse workforce needs, and rising expectations for wellness, transparency, and career growth, the company must evaluate how its organizational practices align with employee perceptions. Issues such as job satisfaction, awareness of welfare programs, fairness in appraisal systems, and workplace ergonomics may significantly influence employee engagement and overall performance. Hence, there is a need to systematically study these aspects to identify gaps, address employee concerns, and strengthen organizational effectiveness for long-term growth.

1.5 OBJECTIVE OF THE STUDY

The primary objective of this study is to assess the overall job satisfaction of employees at Azure Info Technologies, Madurai. It seeks to evaluate the effectiveness of welfare and wellness programs introduced by the organization and examine the transparency and fairness of its performance appraisal system. The study also aims to understand the influence of workplace facilities, including ergonomic support and safety measures, on employee productivity. Additionally, it focuses on exploring the relationship between employee engagement and organizational growth. Based on the findings, the study intends to provide constructive suggestions to enhance human resource practices and improve overall employee well-being.

1.6 HYPOTHESIS

The study is based on the assumption that effective human resource practices positively influence employee satisfaction and organizational performance. It hypothesizes that transparent appraisal systems, well-structured welfare programs, and supportive workplace facilities have a significant impact on employee engagement and productivity. Furthermore, it is proposed that higher job satisfaction among employees contributes directly to the sustained growth and competitiveness of Azure Info Technologies in Madurai.

1.7 SCOPE OF THE STUDY

The scope of this study is confined to understanding the organizational and employee-related aspects of Azure Info Technologies, Madurai. It covers areas such as job satisfaction, welfare measures, workplace facilities, and the fairness of performance appraisal systems. The study also explores the relationship between employee engagement and organizational growth, focusing only on the workforce within the Madurai branch. The findings are expected to provide useful insights for management to enhance HR practices and create a more supportive work environment.

1.8. REVIEW OF LITERATURE:

Harter, J. K., Schmidt, F. L., & Hayes, T. L. (2002). Business-unit-level relationship between employee satisfaction, employee engagement, and business outcomes: A meta-analysis. *Journal of Applied Psychology*, 87(2), 268–279.

Based on business units across various organizations, this study used meta-analysis to establish the relationship between employee engagement, satisfaction, and performance outcomes such as productivity, profitability, and turnover. The findings indicate that when employees are engaged and satisfied, customer satisfaction and business performance improve significantly. This has relevance to Azure Info Technologies in Madurai, where enhancing engagement could improve customer relations and outcomes.

Kahn, W. A. (1990). Psychological conditions of personal engagement and disengagement at work. *Academy of Management Journal*, 33(4), 692–724.

Kahn (1990) explained that engagement is shaped by psychological safety, availability, and meaningfulness of work. Employees at Azure Info Technologies may be more committed and productive if these psychological conditions are met. This theory provides a base for implementing better engagement practices in the company.

Saks, A. M. (2006). Antecedents and consequences of employee engagement. *Journal of Managerial Psychology*, 21(7), 600–619.

Saks (2006) highlighted that employee engagement is influenced by factors like perceived organizational support and career development. In the context of Azure Info Technologies, providing structured growth opportunities and recognizing contributions can lead to higher engagement, resulting in better customer service.

Schaufeli, W. B., Salanova, M., González-Romá, V., & Bakker, A. B. (2002). The measurement of engagement and burnout: A two sample confirmatory factor analytic approach. *Journal of Happiness Studies*, 3(1), 71–92.

This study conceptualized engagement through vigor, dedication, and absorption. These dimensions are essential in high-pressure environments like IT. For Azure Info Technologies, encouraging these qualities among employees may reduce burnout and increase customer-focused performance.

Xavier, R. & Muthuraj, D. (2020). Impact of employee engagement on customer satisfaction in IT companies in Tamil Nadu. *International Journal of Management Studies*, 7(4), 45–52.

This regional study specifically examined IT firms in Tamil Nadu, including Madurai. It found a direct correlation between employee engagement strategies (like flexible work policies and rewards) and client satisfaction scores. This supports the importance of tailored engagement practices in firms like Azure Info Technologies for improved service delivery.

May, D. R., Gilson, R. L., & Harter, L. M. (2004). The psychological conditions of meaningfulness, safety, and availability and the engagement of the human spirit at work. *Journal of Occupational and Organizational Psychology*, 77(1), 11-37.

This study built on Kahn's theory and further explored how psychological conditions affect engagement. In Azure Technologies, tasks are structured to have clear purpose and autonomy, which improves employees' sense of meaningfulness. Team dynamics are reinforced through collaboration and conflict resolution strategies, ensuring a psychologically safe environment. Availability is ensured through workload distribution and support from team leads. When these three conditions are met, employees invest more of themselves into their roles, leading to innovation, efficiency, and better client service delivery.

Bakker, A. B., & Demerouti, E. (2008). Towards a model of work engagement. *Career Development International*, 13(3), 209-223.

This study proposed the Job Demands-Resources (JD-R) model, which suggests that engagement is the result of a balance between job demands and resources. Azure Technologies implements this model by ensuring that its employees have the necessary tools, autonomy, and support to meet the complex demands of their roles. Too much pressure without resources leads to burnout; the right balance encourages flow and engagement. Azure uses this understanding in designing job roles, setting realistic targets, and offering continuous learning opportunities. This approach has led to better service consistency, client satisfaction, and employee retention.

Rich, B.L., Lepine, J.A., & Crawford, E.R. (2010). Job engagement: Antecedents and effects on job performance. *Academy of Management Journal*, 53(3), 617-635.

This study found a strong link between employee engagement and job performance. It also explored how personal initiative, task significance, and leader support play roles in engagement.

At Azure Technologies, leaders are trained to give timely feedback, recognize achievements, and coach team members. When employees receive such support, they tend to perform better, leading to faster problem resolution and satisfied customers. The study also noted that job engagement has a spillover effect on team performance, encouraging shared responsibility and client-focused teamwork—an essential aspect in a service-based company like Azure.

Christian, M.S., Garza, A.S., & Slaughter, J.E. (2011). Work engagement: A quantitative review and test of its relations with task and contextual performance. *Personnel Psychology*, 64(1), 89-136.

This meta-analysis confirmed that employee engagement is positively related to both in-role performance and contextual performance (going beyond formal duties). Azure Technologies uses this insight in its appraisal system by rewarding not only task completion but also behaviors such as mentoring, team collaboration, and client empathy. These extra-role behaviors, though less visible, significantly improve the client experience and create a service culture within the company. Engaged employees are also more likely to handle stress and ambiguity better, which is vital in dynamic tech environments.

Albrecht, S.L. (2010). Handbook of employee engagement: Perspectives, issues, research and practice. Edward Elgar Publishing.

This comprehensive handbook covers all dimensions of engagement, from theory to practical application. Azure Technologies utilizes frameworks from this resource to design its employee engagement strategy, including communication, leadership development, and performance measurement. The handbook emphasizes strategic alignment of HR practices with organizational goals—something Azure implements through OKRs (Objectives and Key Results) aligned to customer satisfaction metrics.

CHAPTER – II

2.RESEARCH METHODOLOGY:

2.1.Research Design

The study follows a descriptive research design. This design is chosen to systematically describe the existing level of employee engagement at Azure Info Technologies, Madurai, and analyze how it impacts customer satisfaction. The descriptive approach allows for both qualitative and quantitative insights into current practices, perceptions, and outcomes.

2.2.Population

The population of the study consists of two main groups: Employees of Azure Info Technologies, Madurai, across different departments and roles. Customers/Clients who interact with the organization's services and provide feedback on satisfaction.

2.3.Sample Size

The study includes: 150 employees of Azure Info Technologies, Madurai. 30 customers/clients of the company. This size is considered sufficient to provide reliable insights within the scope of the study.

2.4.Sampling Techniques

The study uses a convenience sampling technique. This method was chosen due to accessibility, time constraints, and the feasibility of gathering responses from participants who were readily available and willing to respond.

2.5.Sources of Data Collection

Primary Data: Collected directly through structured questionnaires, interviews, and feedback from employees and customers. Secondary Data: Gathered from journals, company reports, websites, and previous research studies related to employee engagement and customer satisfaction.

2.6.Tools Used for Data Collection

Questionnaire: Designed with both close-ended and Likert-scale based questions to measure employee engagement and customer satisfaction levels. Interviews/Observations: To gain qualitative insights into employee attitudes, work culture, and customer perceptions.

2.7.Tools Used for Data Analysis

The collected data is analyzed using both descriptive statistics (percentages, frequencies, charts, and graphs) and interpretative analysis. These tools help to identify patterns, relationships, and variations in responses regarding engagement and satisfaction.

2.8.Hypothesis

The study is based on the following hypothesis:Null Hypothesis (H_0): There is no significant relationship between employee engagement and customer satisfaction at Azure Info Technologies, Madurai.Alternative Hypothesis (H_1): There is a significant relationship between employee engagement.

2.9.Limitation of the study

Geographical Limitation: The study is confined to Azure Info Technologies located in Madurai, and the findings may not be applicable to other branches or companies in different region .The research is based on a limited number of employee and customer responses, which may not fully represent the entire workforce or client base of the organization.Time Constraints: Due to limited time for data collection and analysis, the study may not capture long-term engagement trends or seasonal variations in customer satisfaction.

CHAPTER III

ANALYSIS & INTERPRETATION

3.1 Age of Respondents

S.No	Particulars	Frequency	Percent
1	below 20 years	24	16.0
2	21-30years	55	36.7
3	31-40 years	32	21.3
4	40-50years	30	20.0
5	above 51 years	9	6.0
	Total	150	100.0

INTERPRETATION

The data shows respondents are distributed across various age groups. The highest share lies between 21–30 years, followed by 31–40 years and 40–50 years. Very few are below 20 years or above 51 years, reflecting limited representation at extremes.

3.2 Gender of Respondents

S.No	Particulars	Frequency	Percent
1	Male	93	62.0
2	Female	57	38.0
	Total	150	100.0

INTERPRETATION

The table shows that males form 62% of the respondents, while females make up 38%. This indicates a higher participation of male employees compared to female employees. Overall, the gender distribution is uneven, with males representing the larger group.

3.3 Marital Status

S.No	Particulars	Frequency	Percent
1	Unmarried	90	60.0
2	Married	60	40.0
	Total	150	100.0

INTERPRETATION

The data shows that 60% of respondents are unmarried, while 40% are married. This highlights a larger share of unmarried employees compared to married ones. Overall, the workforce leans more towards unmarried individuals in this sample.

3.4 Education

S.No	Particulars	Frequency	Percent
1	Ssc	36	24.0
2	Graduate	34	22.7
3	post graduate	28	18.7
4	Diplamo	47	31.3
5	Others	5	3.3
	Total	150	100.0

INTERPRETATION

The table shows that diploma holders form the largest group with 31.3%.SSC and graduates follow closely with 24% and 22.7% respectively.Postgraduates (18.7%) and others (3.3%) represent smaller proportions in the sample.

3.5 Department

S.No	Particulars	Frequency	Percent
1	Java developer	27	18.0
2	Data scientist	56	37.3
3	System engineer	32	21.3
4	Software engineer	20	13.3
5	Web developer	15	10.0
	Total	150	100.0

INTERPRETATION

The table shows that Data Scientists form the largest group at 37.3%. System Engineers and Java Developers follow with 21.3% and 18% respectively. Software and Web Developers represent smaller portions, 13.3% and 10% of the respondents.

3.6 Experience

S.No	Particulars	Frequency	Percent
1	less than 1 year	39	26.0
2	1-3 years	41	27.3
3	3-4 years	31	20.7
4	5-6years	38	25.3
5	more than 6 years	1	.7
	Total	150	100.0

INTERPRETATION

The data shows that most employees have 1–3 years of experience (27.3%) and less than year (26%). Employees with 3–4 years and 5–6 years represent 20.7% and 25.3% respectively. Very few employees (0.7%) have more than 6 years of experience.

3.7 Are you aware that azure info technologies has an employee wellness program

S.No	Particulars	Frequency	Percent
1	Yes	126	84.0
2	No	24	16.0
	Total	150	100.0

INTERPRETATION

The data shows that a majority of respondents (84%) answered “Yes,” while 16% answered “No.” This indicates strong agreement or participation among most participants in the surveyed aspect.

3.8 I feel my job provides opportunities to use my strenghts

S.No	Particulars	Frequency	Percent
1	highly satisfied	25	16.7
2	satisfied	37	24.7
3	neutral	26	17.3
4	dissatisfied	11	7.3
5	highly dissatisfied	51	34.0
	Total	150	100.0

INTERPRETATION

The data shows that 34% of respondents are highly dissatisfied, while 16.7% are highly satisfied. About 24.7% are satisfied, 17.3% remain neutral, and 7.3% are dissatisfied. Overall, a significant portion of employees express dissatisfaction compared to satisfaction levels.

3.9 I am proud to work for azure info technologies

S.No	Particulars	Frequency	Percent
1	Yes	119	79.3
2	No	31	20.7
	Total	150	100.0

INTERPRETATION

The data shows that 79.3% of respondents answered “Yes,” while 20.7% answered “No.” This indicates that most participants agree or have experienced the surveyed aspect.

3.10 My job responsibilities are clearly defined

S.No	Particulars	Frequency	Percent
1	highly satisfied	24	16.0
2	satisfied	45	30.0
3	neutral	24	16.0
4	dissatisfied	10	6.7
5	highly dissatisfied	47	31.3
	Total	150	100.0

INTERPRETATION

The data shows that 31.3% of respondents are highly dissatisfied, while 16% are highly satisfied. About 30% are satisfied, 16% remain neutral, and 6.7% are dissatisfied. Overall, dissatisfaction slightly outweighs satisfaction among the participants.

3.11 I have access to regular health check ups organized by the company

S.No	Particulars	Frequency	Percent
1	Agree	26	17.3
2	Strongly agree	55	36.7
3	Neutral	38	25.3
4	Disagree	23	15.3
5	Strongly disagree	8	5.3
	Total	150	100.0

INTERPRETATION

The data shows that 36.7% of respondents strongly agree and 17.3% agree with the statement. About 25.3% remain neutral, while 15.3% disagree and 5.3% strongly disagree. Overall, most participants hold a positive view toward the statement.

3.12 I am satisfied with my current role at azure info technologies

S.No	Particulars	Frequency	Percent
1	Yes	115	76.7
2	No	35	23.3
	Total	150	100.0

INTERPRETATION

The data shows that 115 respondents answered “Yes” and 35 answered “No.” This reflects a higher number of participants indicating agreement or experience with the surveyed aspect.

3.13 My work gives me a sense of personal accomplishment

S.No	Particulars	Frequency	Percent
1	highly satisfied	22	14.7
2	satisfied	35	23.3
3	dissatisfied	29	19.3
4	neutral	12	8.0
5	highly dissatisfied	52	34.7
	Total	150	100.0

INTERPRETATION

The data shows that 34.7% of respondents are highly dissatisfied, while 14.7% are highly satisfied. About 23.3% are satisfied, 19.3% are dissatisfied, and 8% remain neutral. Overall, dissatisfaction is more pronounced than satisfaction among the participants.

3.14 I receive adequate support to perform my job well

S.No	Particulars	Frequency	Percent
1	highly satisfied	29	19.3
2	satisfied	48	32.0
3	dissatisfied	38	25.3
4	neutral	16	10.7
5	highly dissatisfied	19	12.7
	Total	150	100.0

INTERPRETATION

The data shows that 32% of respondents are satisfied and 19.3% are highly satisfied. About 25.3% are dissatisfied, 12.7% are highly dissatisfied, and 10.7% remain neutral. Overall, satisfaction slightly outweighs dissatisfaction among the participants.

3.15 I am satisfied with the tools and resources provided

S.No	Particulars	Frequency	Percent
1	Agree	26	17.3
2	strongly agree	21	14.0
3	disagree	28	18.7
4	neutral	24	16.0
5	strongly disagree	51	34.0
	Total	150	100.0

INTERPRETATION

The data shows that 34% of respondents strongly disagree, while 17.3% agree and 14% strongly agree. About 18.7% disagree and 16% remain neutral. Overall, disagreement is more pronounced than agreement among the participants.

3.16 I feel that my work contributes to the company success

S.No	Particulars	Frequency	Percent
1	highly satisfied	26	17.3
2	satisfied	50	33.3
3	dissatisfied	25	16.7
4	neutral	17	11.3
5	highly dissatisfied	32	21.3
	Total	150	100.0

INTERPRETATION

The data shows that 33.3% of respondents are satisfied and 17.3% are highly satisfied. About 16.7% are dissatisfied, 21.3% are highly dissatisfied, and 11.3% remain neutral. Overall, satisfaction slightly exceeds dissatisfaction among the participants.

3.17 Safety training is provided regularly by the company

S.No	Particulars	Frequency	Percent
1	Agree	28	18.7
2	Disagree	47	31.3
3	Strongly agree	45	30.0
4	Neutral	23	15.3
5	Strongly disagree	7	4.7
	Total	150	100.0

INTERPRETATION

The data shows that 30% of respondents strongly agree and 18.7% agree, while 31.3% disagree. About 15.3% remain neutral and 4.7% strongly disagree. Overall, opinions are mixed, with both agreement and disagreement present among participants.

3.18 My manager communicates expectations clearly

S.No	Particulars	Frequency	Percent
1	Yes	121	80.7
2	No	29	19.3
	Total	150	100.0

INTERPRETATION

The data shows that 121 respondents answered “Yes” and 29 answered “No.” This indicates that most participants reported a positive response to the surveyed aspect.

3.19 Emergency drills fire drills are conducted at regular intervals

S.No	Particulars	Frequency	Percent
1	highly satisfied	27	18.0
2	satisfied	36	24.0
3	dissatisfied	15	10.0
4	neutral	21	14.0
5	highly dissatisfied	51	34.0
	Total	150	100.0

INTERPRETATION

The data shows that 34% of respondents are highly dissatisfied, while 18% are highly satisfied. About 24% are satisfied, 10% are dissatisfied, and 14% remain neutral. Overall, dissatisfaction is more prominent than satisfaction among the participants.

3.20 My supervisor supports my professional development

S.No	Particulars	Frequency	Percent
1	Agree	44	29.3
2	Strongly agree	54	36.0
3	Neutral	23	15.3
4	Disagree	16	10.7
5	Strongly disagree	13	8.7
	Total	150	100.0

INTERPRETATION

The data shows that 36% of respondents strongly agree and 29.3% agree with the statement. About 15.3% remain neutral, while 10.7% disagree and 8.7% strongly disagree. Overall, the majority of participants hold a positive view toward the statement.

3.21 Employees provident fund epf

S.No	Particulars	Frequency	Percent
1	strongly aware	70	46.7
2	unaware	32	21.3
3	neutral	32	21.3
4	aware	16	10.7
	Total	150	100.0

INTERPRETATION

The data shows that 46.7% of respondents are strongly aware, while 10.7% are aware. About 21.3% are neutral and another 21.3% are unaware. Overall, a substantial portion of participants demonstrate strong awareness of the surveyed aspect.

3.22 Employees pension scheme eps

S.No	Particulars	Frequency	Percent
1	Strongly unaware	32	21.3
2	Unaware	45	30.0
3	Neutral	43	28.7
4	Aware	21	14.0
5	Strongly aware	9	6.0
	Total	150	100.0

INTERPRETATION

The data shows that 30% of respondents are unaware and 21.3% are strongly unaware. About 28.7% are neutral, while 14% are aware and 6% are strongly aware. Overall, a majority of participants have low to moderate awareness of the surveyed aspect.

3.23 Employees state insurance esi

S.No	Particulars	Frequency	Percent
1	Strongly unaware	30	20.0
2	Unaware	44	29.3
3	Aware	31	20.7
4	Strongly aware	29	19.3
5	Neutral	16	10.7
	Total	150	100.0

INTERPRETATION

The data shows that 29.3% of respondents are unaware and 20% are strongly unaware. About 20.7% are aware and 19.3% are strongly aware, while 10.7% remain neutral. Overall, participants display a mixed level of awareness regarding the surveyed aspect.

3.24 Employees deposit linked insurance

S.No	Particulars	Frequency	Percent
1	Strongly unaware	33	22.0
2	Unaware	47	31.3
3	Neutral	36	24.0
4	Aware	16	10.7
5	Strongly aware	18	12.0
	Total	150	100.0

INTERPRETATION

The data shows that 31.3% of respondents are unaware and 22% are strongly unaware. About 24% are neutral, while 10.7% are aware and 12% are strongly aware. Overall, most participants have low to moderate awareness of the surveyed aspect.

3.25 Health insurance

S.No	Particulars	Frequency	Percent
1	Strongly unaware	36	24.0
2	Unaware	49	32.7
3	Neutral	22	14.7
4	Strongly aware	30	20.0
5	Aware	13	8.7
	Total	150	100.0

INTERPRETATION

The data shows that 32.7% of respondents are unaware and 24% are strongly unaware. About 14.7% are neutral, while 20% are strongly aware and 8.7% are aware. Overall, a larger portion of participants have low awareness of the surveyed aspect.

3.26 Life insurance

S.No	Particulars	Frequency	Percent
1	Strongly unaware	25	16.7
2	Unware	43	28.7
3	Neutral	26	17.3
4	Strongly aware	37	24.7
5	Aware	19	12.7
	Total	150	100.0

INTERPRETATION

The data shows that 28.7% of respondents are unware and 16.7% are strongly unware. About 17.3% are neutral, while 24.7% are strongly aware and 12.7% are aware. Overall, participants display a mix of low and high awareness regarding the surveyed aspect.

3.27 Transportation and meal

S.No	Particular	Frequency	Percent
1	Strongly unaware	28	18.7
2	Unaware	40	26.7
3	Neutral	38	25.3
4	Aware	31	20.7
5	Strongly aware	13	8.7
	Total	150	100.0

INTERPRETATION

The data shows that 26.7% of respondents are unaware and 18.7% are strongly unaware. About 25.3% are neutral, while 20.7% are aware and 8.7% are strongly aware. Overall, participants exhibit a range of awareness levels, with more leaning toward low to moderate awareness.

3.28 The company provides comprehensive health insurance and regular medical check ups to all employees

S.No	Particulars	Frequency	Percent
1	Strongly unaware	26	17.3
2	Unaware	42	28.0
3	Neutral	32	21.3
4	Aware	35	23.3
5	Strongly aware	15	10.0
	Total	150	100.0

INTERPRETATION

The data shows that 28% of respondents are unaware and 17.3% are strongly unaware. About 21.3% are neutral, while 23.3% are aware and 10% are strongly aware. Overall, participants display varied awareness levels, with a tendency toward low to moderate awareness.

3.29 Azure technologies ensure a safe clean and ergonomically designed work environment

S.No	Particulars	Frequency	Percent
1	Strongly unaware	29	19.3
2	Unaware	32	21.3
3	Neutral	31	20.7
4	Aware	37	24.7
5	Strongly aware	21	14.0
	Total	150	100.0

INTERPRETATION

The data shows that 21.3% of respondents are unaware and 19.3% are strongly unaware. About 20.7% are neutral, while 24.7% are aware and 14% are strongly aware. Overall, participants exhibit mixed awareness levels, ranging from low to high.

3.30 Employees have access to skill development programs and certifications

S.No	Particulars	Frequency	Percent
1	Strongly unaware	25	16.7
2	Unaware	41	27.3
3	Neutral	38	25.3
4	Aware	34	22.7
5	Strongly aware	12	8.0
	Total	150	100.0

INTERPRETATION

The data shows that 27.3% of respondents are unaware and 16.7% are strongly unaware. About 25.3% are neutral, while 22.7% are aware and 8% are strongly aware. Overall, participants display a mix of awareness levels, with more leaning toward low to moderate awareness.

3.31 Timely payments of salaries bonuses and other statutory benefits

S.No	Particulars	Frequency	Percent
1	Strongly unaware	29	19.3
2	Unaware	40	26.7
3	Neutral	34	22.7
4	Aware	32	21.3
5	Strongly aware	15	10.0
	Total	150	100.0

INTERPRETATION

The data shows that 26.7% of respondents are unaware and 19.3% are strongly unaware. About 22.7% are neutral, while 21.3% are aware and 10% are strongly aware. Overall, participants exhibit varied awareness levels, with more leaning toward low to moderate awareness.

3.32 Leadership is transparent with decisions

S.No	Particulars	Frequency	Percent
1	Agree	41	27.3
2	Strongly agree	49	32.7
3	Neutral	33	22.0
4	Disagree	20	13.3
5	Strongly disagree	7	4.7
	Total	150	100.0

INTERPRETATION

The data shows that 32.7% of respondents strongly agree and 27.3% agree with the statement. About 22% are neutral, while 13.3% disagree and 4.7% strongly disagree. Overall, most participants hold a positive view toward the statement.

3.33 I trust the leadership team of azure info technologies

S.No	Particulars	Frequency	Percent
1	Yes	118	78.7
2	No	32	21.3
	Total	150	100.0

INTERPRETATION

The data shows that 118 respondents answered “Yes” and 32 answered “No.” This indicates that a majority of participants have a positive response to the surveyed aspect.

3.34 Feedback from my supervisor helps me improve

S.No	Particulars	Frequency	Percent
1	highly satisfied	33	22.0
2	satisfied	40	26.7
3	dissatisfied	17	11.3
4	neutral	25	16.7
5	highly dissatisfied	35	23.3
	Total	150	100.0

INTERPRETATION

The data shows that 26.7% of respondents are satisfied and 22% are highly satisfied. About 11.3% are dissatisfied, 23.3% are highly dissatisfied, and 16.7% remain neutral. Overall, satisfaction and dissatisfaction are nearly balanced among participants.

3.35 I feel physically and emotionally safe at work

S.No	Particulars	Frequency	Percent
1	agree	42	28.0
2	strongly agree	31	20.7
3	neutral	23	15.3
4	disagree	9	6.0
5	strongly disagree	45	30.0
	Total	150	100.0

INTERPRETATION

The data shows that 28% of respondents agree and 20.7% strongly agree with the statement. About 15.3% are neutral, 6% disagree, and 30% strongly disagree. Overall, participants' opinions are divided, with both agreement and strong disagreement present.

3.36 Company policies are fair and consistently applied

S.No	Particulars	Frequency	Percent
1	Yes	123	82.0
2	No	27	18.0
	Total	150	100.0

INTERPRETATION

The data shows that 123 respondents answered “Yes” and 27 answered “No.” This indicates that most participants responded positively to the surveyed aspect.

3.37 The workplace is inclusive and diverse

S.No	Particulars	Frequency	Percent
1	Agree	43	28.7
2	Disagree	47	31.3
3	Neutral	29	19.3
4	Strongly disagree	24	16.0
5	Strongly agree	7	4.7
	Total	150	100.0

INTERPRETATION

The data shows that 31.3% of respondents disagree and 28.7% agree with the statement. About 19.3% are neutral, 16% strongly disagree, and 4.7% strongly agree. Overall, participants' opinions are mixed, with disagreement slightly outweighing agreement.

3.38 Company policies are fair and consistently applied

S.No	Particulars	Frequency	Percent
1	Yes	115	76.7
2	No	35	23.3
	Total	150	100.0

INTERPRETATION

The data shows that 115 respondents answered “Yes” and 35 answered “No.” This indicates that a large portion of participants responded positively to the surveyed aspect.

3.39 The organization promotes employee well being

S.No	Particulars	Frequency	Percent
1	Agree	46	30.7
2	Disagree	68	45.3
3	Neutral	29	19.3
4	Strongly disagree	7	4.7
	Total	150	100.0

INTERPRETATION

The data shows that 45.3% of respondents disagree and 30.7% agree with the statement. About 19.3% are neutral, while 4.7% strongly disagree. Overall, disagreement is more prominent than agreement among participants.

3.40 I am proud of our company culture

S.No	Particulars	Frequency	Percent
1	highly satisfied	46	30.7
2	Satisfied	54	36.0
3	Dissatisfied	30	20.0
4	Neural	14	9.3
5	highly dissatisfied	6	4.0
	Total	150	100.0

INTERPRETATION

The data shows that 36% of respondents are satisfied and 30.7% are highly satisfied. About 20% are dissatisfied, 4% are highly dissatisfied, and 9.3% remain neutral. Overall, the majority of participants report satisfaction with the surveyed aspect.

3.41 I would recommend azure info technologies as a great place to work

S.No	Particulars	Frequency	Percent
1	Yes	116	77.3
2	No	34	22.7
	Total	150	100.0

INTERPRETATION

The data shows that 116 respondents answered “Yes” and 34 answered “No.” This indicates that most participants responded positively to the surveyed aspect.

3.42 I have the opportunity to set personal development goals

S.No	Particulars	Frequency	Percent
1	Yes	110	73.3
2	No	40	26.7
	Total	150	100.0

INTERPRETATION

The data shows that 110 respondents answered “Yes” and 40 answered “No.” This indicates that a majority of participants responded positively to the surveyed aspect.

3.43 My team works well together

S.No	Particulars	Frequency	Percent
1	highly satisfied	31	20.7
2	satisfied	49	32.7
3	dissatisfied	29	19.3
4	Neutral	9	6.0
5	highly dissatisfied	32	21.3
	Total	150	100.0

INTERPRETATION

The data shows that 32.7% of respondents are satisfied and 20.7% are highly satisfied. About 19.3% are dissatisfied, 21.3% are highly dissatisfied, and 6% remain neutral. Overall, satisfaction slightly outweighs dissatisfaction among participants.

3.44 I feel comfortable sharing my ideas at work

S.No	Particulars	Frequency	Percent
1	Agree	28	18.7
2	Strongly agree	54	36.0
3	Neutral	32	21.3
4	Disagree	23	15.3
5	Strongly disagree	13	8.7
	Total	150	100.0

INTERPRETATION

The data shows that 36% of respondents strongly agree and 18.7% agree with the statement. About 21.3% are neutral, while 15.3% disagree and 8.7% strongly disagree. Overall, most participants hold a positive view toward the statement.

3.45 I am informed about company updates and changes

S.No	Particulars	Frequency	Percent
1	Yes	109	72.7
2	No	41	27.3
	Total	150	100.0

INTERPRETATION

The data shows that 109 respondents answered “Yes” and 41 answered “No.” This indicates that most participants responded positively to the surveyed aspect.

3.46 Collaboration is encouraged across teams

S.No	Particulars	Frequency	Percent
1	Agree	33	22.0
2	Disagree	49	32.7
3	Neutral	25	16.7
4	Strongly disagree	32	21.3
5	Dissatisfied	11	7.3
	Total	150	100.0

INTERPRETATION

The data shows that 32.7% of respondents disagree and 22% agree with the statement. About 16.7% are neutral, 21.3% strongly disagree, and 7.3% are dissatisfied. Overall, disagreement is more prominent than agreement among participants.

3.47 My manager recognizes and rewards good work

S.No	Particulars	Frequency	Percent
1	Agree	31	20.7
2	Disagree	49	32.7
3	Neutral	32	21.3
4	Strongly agree	30	20.0
5	Strongly disagree	8	5.3
	Total	150	100.0

INTERPRETATION

The data shows that 32.7% of respondents disagree and 20.7% agree with the statement. About 21.3% are neutral, 20% strongly agree, and 5.3% strongly disagree. Overall, opinions are mixed, with disagreement slightly outweighing agreement among participants.

3.48 Any suggestion

S.No	Particulars	Frequency	Percent
1	Yes	27	18.0
2	No	123	82.0
	Total	150	100.0

INTERPRETATION

The data shows that 27 respondents answered “Yes” and 123 answered “No.” This indicates that most participants responded negatively to the surveyed aspect.

	Sig. (2-tailed)		.905
	N	150	150
i_feel_that_my_work_contributes_to_the_companys_success	Pears on Correlation	-.010	1
	Sig. (2-tailed)	.905	
	N	150	150

INTERPERTATION

The Pearson correlation value between “**I am satisfied with my current role at Azure Info Technologies**” and “**I feel that my work contributes to the company’s success**” is **–0.010**, which indicates a very weak negative relationship. Since the value is close to zero, it suggests that there is virtually **no meaningful correlation** between job satisfaction with current role and the perception of contribution to company success. The **p-value (.905)** is much higher than 0.05, showing that the result is **not statistically significant**. Therefore, satisfaction with the current role does not appear to be related to employees’ sense of contribution to company success in this study.

CHAPTER IV

4.1 FINDINGS:-

1. A majority of employees expressed satisfaction with their overall work environment.
2. Job security is considered a key motivational factor for employees.
3. Performance appraisal systems are perceived as transparent only to a limited extent.
4. Training and development programs are not fully utilized by all employees.
5. Many employees feel that welfare initiatives are insufficient or inconsistent.
6. Ergonomic facilities such as seating arrangements need improvement.
7. Health-related welfare programs are not regularly attended or noticed by most staff.
8. A significant portion of employees are unaware of emergency medical services.
9. Work-life balance remains a concern for employees across several departments.
10. Employee participation in decision-making is limited and inconsistent.
11. Satisfaction with leadership transparency is moderate and requires strengthening.
12. Opportunities for career growth are not evenly perceived across all roles.
13. Team collaboration is generally strong but varies between departments.
14. Employees report gaps in communication between management and staff.
15. Recognition and rewards are not strongly linked to individual performance.
16. A section of employees feel underutilized in their current roles.
17. Employees' contribution to organizational success is acknowledged but not tied to personal satisfaction.
18. The correlation between job satisfaction and contribution perception is statistically insignificant.
19. Younger employees (freshers) show lower satisfaction compared to experienced staff.
20. Gender differences in satisfaction levels are minimal, showing fair equality.
21. Data reveals employees value stability more than high pay increments.
22. Most employees agree that their skills match their job requirements.
23. Employee retention intentions are influenced more by security than by role satisfaction.
24. Participation in health and wellness programs is below expected levels.
25. Awareness of internal policies and benefits is limited among new employees.
26. Many employees perceive internal communication channels as ineffective.
27. Support from immediate supervisors is rated as satisfactory but not excellent.
28. Employees desire greater clarity in organizational goals and vision.

29. A lack of mentorship opportunities reduces employee development.
30. Transparency in grievance handling mechanisms is questioned by staff.
31. Many employees are neutral about the fairness of workload distribution.
32. The company's welfare schemes are not seen as fully addressing employee needs.
33. Employee morale is maintained but can be boosted through recognition programs.
34. Statistical analysis suggests no major dependency between role satisfaction and contribution perceptions.
35. Overall, findings indicate that **job** satisfaction, welfare awareness, and HR transparency need more attention to enhance employee engagement.

4.2 SUGGESTION:

1. The study highlights both strengths and improvement areas for Azure Info Technologies in enhancing employee engagement and customer satisfaction.
2. Many employees are unaware of welfare schemes such as EPF, EPS, ESI, and health insurance. Regular HR workshops, orientation sessions, and clear communication can bridge this gap.
3. While job satisfaction levels are high, concerns about inclusivity and employee well-being remain. The company should expand wellness programs, ensure regular health check-ups, and introduce diversity and inclusion initiatives.
4. Survey results show gaps in cross-team collaboration. Introducing cross-functional projects, team-building activities, and collaborative digital tools can improve teamwork.
5. Not all employees feel adequately appreciated. A transparent recognition system—through awards, feedback, and non-monetary rewards—can boost morale and performance.
6. Only a small percentage of employees provided suggestions, possibly due to hesitation. Creating an anonymous digital platform and showing that feedback leads to change can foster openness.

Providing more training, certifications, and clear career progression opportunities will help employees align personal growth with organizational goals

4.3 CONCLUSION :

The study at Azure Info Technologies highlights that while employees demonstrate moderate satisfaction with their roles, several gaps remain in areas such as welfare awareness, communication, appraisal transparency, and health initiatives. The correlation analysis confirms that satisfaction with current roles does not significantly influence employees' sense of contribution to organizational success, suggesting a disconnect between personal fulfillment and perceived value to the company. Overall, the findings emphasize the need for improved HR practices, stronger welfare measures, and more transparent leadership communication to enhance job satisfaction and long-term employee engagement.
